COTTON

Application Rates/Methods:

Soil:

- Sandy soil 1 quart to the acre, clay or high organic matter soil 12.8 ounces to the acre.
- In furrow with seed at planting, if possible.

Foliar:

- 12.8 ounces to 1 quart to the acre
- Between pinhead and first bloom (can be mixed with Pix if applicable)

Benefits:

Stronger and straighter tap root

Stronger, healthier plant

Increased fine feeder roots resulting in improved water and nutrient uptake.

Lower gin trash

Improved quality

Method of Application:

Applied thru overhead, aerial irrigation and mixed with sprayer tank containing start up fertilizers and/or herbicides.

Ensure tank is free of residue, avoid chlorinated water, if possible.

Do not apply when a crop is severely stressed.

Do not mix with fungicides or insecticides and do not apply within 2 weeks of applying fungicides.

May be mixed with a 2,4-D herbicide, and Round-up as well as roundup ready seeds.

In light of new seed developments and/or stacked seeds, contact manufacturer's technical support.

Waste Away after harvest can help with the clean up of crop residue.
